## Articles

Dr P Abeles: an appreciation of **4**:15
Abutments (precast) for Kuwait flyover **11**:15
After brick, concrete or cream cheese? **5**:12
Aggregate concrete, structural lightweight **8**:30
Aggregate—crushed rock **3**:22
Aggregates (alkali reactive) from the Middle East **5**:27
Aggregates (L/W) for structural concrete **8**:29
Analysing hardened concrete **4**:29
Analysis of fresh concrete off-site **8**:27
An appreciation of Paul Abeles **4**:15
Art—Salt Lake City **12**:33
Aspects of cement-based mortars for brickwork and blockwork **1**:27
Bank headquarters—a Munich masterpiece **9**:12
BAUMA 1980 **7**:32
Berwick Bridge—Repair of **10**:31
A bridge for Mecca **12**:12
Bridge within a bridge **1**:12
Bridges—an important 25 year span **8**:16
BS4466 An open statement from the Committee Chairman **6**:18
BS 5328 and CP 110—conflict in concrete quality requirement of **3**:32
Byker Viaduct **6**:39
Cable stayed stand a winner at Goodwood **4**:24
Canoe—Constructing a cup-winning **9**:24
Canoe Races 1980 **7**:13
Canoe Races—next years **12**:21
Carlsberg Brewery **6**:45
Carmarthen Bridge **1**:12
Century saga of Plymouth wavebreakers **6**:20
Ceramic finishes to concrete retaining walls **1**:23
A chance to meet Peter Burgess **7**:18
A chance to meet Tom Kirkbride **9**:14
Check list for site concreting **9**:32
Chloride-free accelerators **4**:39
C I 1980 **3**:41
C180—Seen and heard **5**:14
C180 A technical summary **9**:37
Circular prestressed tank at Rashidiya **9**:19
The Coades and their stone part 1 **10**:18
The Coades and their stone part 2 **11**:27
Colour and the environment **11**:23
Colour—A touch of **5**:19
Comments on 'unsolved mystery' in concrete technology **4**:28
Community concrete **3**:36
Complex scheme for Sussex reservoir **3**:28
Concrete and thatch **10**:17
Concrete bridges: an important 25 year span **8**:16
Concrete canoe races **8**:12
'Concrete egg' Tonhalle at Dusseldorf **4**:12
Concreting facing—After brick concrete or cream cheese **5**:12
A concrete house from the thirties **10**:29
Concrete in housing **4**:22
Concrete in the water industry **1**:21
Conflicts in concrete quality requirements of CP110 & BS5328 **3**:32
Concrete materials research seminar **9**:34
Concrete research programme **12**:28
The Concrete Society Award 1980 **6**:33
Constructing a cup-winning canoe **9**:24
Cottages—concrete and thatch **10**:17
Coutts Bank **6**:49
CP110 & BS 5328—conflict in quality requirements of **3**:32
CP110 and the concrete producer **7**:38
Crushed rock as aggregate **3**:22
A day at Dinorwic **12**:24
Decoration and protection **11**:22
Design of the Ruck-a-Chucky bridge **2**:12
Diamonds can be a contractors best friend **2**:22
Dilemmas of concrete specification **8**:36
Dinorwic—A day at **12**:24
Dolphin solves Isle of Man problem **8**:21
Domes (ferrocement) on Amman Mosque **10**:12
Drilling and grouting plant demonstrations **10**:38
Drilling—diamonds can be a contractors best friend **2**:22
Dundee harbour's historic concrete **9**:22
Dusseldorf 'concrete egg' Tonhalle at **4**:12
Energy (wave) and concrete **7**:24
Exeter Office Building **6**:49
Failure modes of: Micro-concrete models **11**:30
Ferrocement domes on Amman Mosque **10**:12
The Fifteen year syndrome—latent defects **5**:31
Finishes—ceramic-to concrete retaining walls **1**:23
Finniston and The Concrete Society **7**:25
The five per cent failure level in practice **3**:25
Formwork engineer and project information **10**:27
Formwork Symposium **9**:29
Forty-three storey slipformed Warsaw air terminal **5**:23
Footbridges at Milton Keynes **2**:29
Foundations (piled) for housing **8**:31
Fresh concrete analysis off-site **8**:27
Goodwood—Cable stayed stand a winner at **4**:24
Grouting and drilling plant demonstrations **10**:38
Gulf—Ready mixed development in the **8**:24
Harbour (Dundee) and historic concrete **9**:22
Hardened concrete, analysing **4**:29
Hardham Treatment Works—complex scheme for Sussex reservoir **3**:28
Harriston Village **6**:47
Headroom at Hemel Hempstead **8**:32
Hejoune Bridge—Mecca **12**:12
Hemel Hempstead—Headroom at **8**:32
Honest to concrete **12**:32
Hong Kong—Construction in **1**:16
Hounslow Civic Centre **6**:45
Housing and concrete **4**:22
Housing—piled foundations for **8**:31
How unfair is CP110 to the concrete producer **7**:38
Howden (South) Sewage Treatment Works **6**:47
Hypo-Bank Munich **9**:23
IABSE returns to Vienna **12**:26
ICT Annual Technical Meeting **12**:25
ICT Newsletter **2**:28
ICT Newsletter **6**:38
ICT Newsletter **11**:25
Incremental launching of concrete bridges **8**:33
In the right place **12**:22
Isle of Man—Dolphin solves problem **8**:21
Kuwait flyovers—Precast abutments **11**:15
Langdon Battery **6**:43
A Large pour at Slough **10**:30
Latent defects—The 15 years syndrome **5**:31
Lightweight aggregate for structural concrete **8**:29
Lightweight (structural) aggregate concrete **8**:30
A look at construction in Hong Kong **1**:16
Materials (concrete) research seminar **9**:34
Mecca—A bridge for **12**:12
Middle East—Potentially alkali-reactive aggregates from **5**:27
Micro-concrete models **11**:30
Milton Keynes—Footbridges **2**:29
Mortar for brickwork and blockwork, Aspects of **1**:27
Mosque in Amman with Ferrocement domes **10**:12
Munick bank headquarters **9**:12
Neath Hill Housing **6**:51
Next year's concrete canoe races **12**:21
Nineteenth century concrete and the Royal Engineers—Part 1 **3**:12
Nineteenth century concrete and the Royal Engineers—Part 2 **4**:18
Ninian Central Platform **6**:49
Ninian Central Platform-CS Site Practice Award **11**:14
On the track of Sam's brothers **1**:20
An open statement from the BS4466 Committee **6**:18
Other peoples recipes **8**:23
Oxen art in Salt Lake City **12**:33
Pigments—A touch of colour **5**:20
Piled foundations for housing **8**:31
Placing of concrete—In the right place **12**:22
Plymouth wavebreakers, Century saga of **6**:20
Potentially alkali-reactive aggregate from the Middle East **5**:27
Pour large—at Slough **10**:30
Precast abutments for Kuwait flyovers **11**:15
Precast porches **2**:26
Prestressed circular rank at Rashidiya **9**:19
Project information and the formwork engineer **10**:27
Random thoughts and reflections **1**:25
Ready mixed concrete: Tale of a truckmixer **5**:16
Ready mixed development in the Gulf **8**:24
Reinforcement rusting **5**:34
Repairing Berwicks half century old bridge **10**:31
Research (concrete materials) Seminar **9**:34
Reservoir—A day at Dinorwic **12**:24
Retaining walls—ceramic finishes to **1**:23
A review of sprayed concrete —Part 1 **2**:17
A review of sprayed concrete —Part 2 **3**:20
A review of sprayed concrete —Part 3 **4**:32
Richard III rules OK **9**:28
Rolled lean concrete **3**:19
Royal Engineers—Nineteenth century concrete and the—Part 1 **3**:12
